## Scenery & Sanctuary

These Daniel Island homeowners worked with a landscape architect to maximize their curb appeal and the views of the marsh, all while designing a custom deck surrounding their pool.

# BEHIND THE SCENES

Take a private tour of the rooms used in *Charleston Home + Design* magazine's new television commercial.

This past fall, *Charleston Home + Design* magazine joined forces with industry veteran Mark Bradley of Bradley Advertising & Marketing to produce a new television commercial to promote the *Charleston Home + Design* home shows that the team hosts each year in January and August. It was clear that the setting required a stunning local home to

create the perfect backdrop for our message, which was, "If you can dream it, one of the vendors at our shows can make it happen." From there, *Charleston Home + Design* magazine teamed with SHELTER Custom-Built Living, a fully custom home builder headquartered on Daniel Island, to film on location at the personal home of Ryan and Jenny Butler. As the owners of

(top left) The open concept kitchen showcases sleek modern features like the leather black "Absolute" granite, tongue and groove white oak flooring, and a Dolomite Marble Backsplash by Buckhannon Tile + Design. (top right) A Wedi Zero Entry shower system is designed without any shower curbs for a seamless look. (bottom left) Inset, flat panel kitchen cabinetry maintains the contemporary style seen throughout the home. (bottom right) The master bathroom features Matte Dolomite Tile flooring, honed Turkish Carrara marble countertops from Palmetto Surfacing, and Durasupreme dark wood cabinetry from The Coastal Cabinet Company.

SHELTER Custom-Built Living, Ryan and Jenny Butler poured all of their home-building prowess into their abode.

Mark Bradley also suggested that a young couple with small children should star in this commercial to both exemplify and connect with quintessential Lowcountry homeowners.

*Charleston Home + Design's* own Art Director, Patrick Brickman, and his youthful family fit the bill, so the next challenge fell to where each scene would be shot in the Butler's impeccable home. Every room offered a new and surprising feature that was considered ideal for the commercial. In short, the final product barely

(top left) Homeowners Jenny and Ryan Butler knew they needed a classy, open space for friends and family to gather, so they opted for a waterfall edge on the leather black granite and sophisticated color palette. (top right) The dining area boasts a unique golden ceiling accent with a fun and funky chandelier from Ateriross. (bottom left) The modern, flush trim throughout the house is a must-have for any contemporary scheme. (bottom right) A softly hued blue velvet couch adds a touch of color to the overall neutral color scheme of the first floor.

scratched the surface of how many custom characteristics can be found in Ryan and Jenny's domicile, but because the structure was also included in the *Charleston Home + Design* magazine's April Home Tour on Daniel Island, many more people were inspired by how functional and beautiful a custom home has the potential to be. Many thanks to Ryan and Jenny for opening

their home in order to share the many perks of custom home building with the public!
